Collect & Play

It was Dr Ferdinand Porsche's 356th design, a rear-engined sports car with a streamlined body by Erwin Komenda. The official presentation of the Speedster to the U.S. market took place in September 1954 at the Concours d'Elegance at Watkins Glen and the "356" received the prize awarded in the category "Most interesting car".

The 356 Speedster was introduced by Max Hoffman, at the time the sole US importer of Porsches. He insisted that future Porsches should resemble a small Jaguar XK 120 and cost less than \$3000. So refined, the car with a focus on performance was an instant hit. Porsche proceeded to manufacture more than four thousand of them through 1959.

Technical details

4 flat cylinder, air-cooled engine, 1500 ccm,
55 hp at 4500 RPM
Maximum speed: approx. 150 km/hour

About the Model

arcurio®'s limited edition Porsche 356 Speedster is handcrafted to the scale of 1:12. This example of a German Icon amongst 50's sports car legends is one of the finest you can find and is a great asset to your classic collection.

Production & Materials used

Four (4) different types of premium European woods are used: Alder, Maple, Birch and Beech. The wood itself is left completely natural, using only olive oil and wax to finish each model, no paint or other chemicals are employed. And all 116 parts are individually hand assembled with great care and perfection to ensure each wood grain seamlessly matches the next. Each model is crafted individually and therefore comes complete with a brass plate engraved with its own unique production number.

Special Features of the Model

This high quality model is completed with opening hood, side doors, and functional steering.

Further details

- Miniscule detailed dashboard
- Review mirror
- "Butterfly fixings" on all hub caps
- Filigree "Porsche" emblem on rear hood

Size: 14"L x 5,5"W x 5,0 H
